Chief Information Officer

There’s nothing more satisfying than knowing you’ve made a difference in the life of another. As a Professional at Oregon Mutual Insurance you immediately become an integral part of a team that fulfills our company’s mission to provide peace of mind to our customers by delivering superior products and service.

We understand our strength is our people. You can’t have a Corporate Mission unless you believe in it and you can’t have Corporate Values unless you are willing to live by them. You could be the best at what you do, yet at Oregon Mutual Insurance we are only interested in the best who are passionate about their work, who want to learn our products and services, and help our customers every day. If you are you an enthusiastic, collaborative, knowledge-hungry learner who is eager to be a team player and likes a challenge, this could be the right place for you!

Located in McMinnville Oregon, the Chief Information Officer (CIO) provides strategic and operational direction in the design, development, installation and support of information systems and technology to ensure our continued growth and success. In addition to having overall responsibility for the direction and management of our IT business and business functions, the position is responsible for the effective and efficient utilization of resources and building strong relationships with the leadership team, key stakeholders and department managers.

Key Responsibilities

- As a member of Senior Management, help develop short and long term corporate strategic and operational plans with emphasis on the role that technology, information, and communication services can support the plans and mission of the company.
- Confer with stakeholders to identify needs that are not being met and develop strategy to meet those needs.
- Confer with stakeholders to identify processes and procedures that are no longer necessary and develop plans to refocus those misdirected resources.
- Evaluate and assess current data processing technology and techniques; identifying resources needed; analyzing costs and benefits.
- Regularly evaluate the management structure of the Information Systems Division in response to changes in the technological environment and stakeholder needs
- Recommend plans for automation including techniques and equipment needs to Executive Management.
- Provide cost benefit analyses of various options and recommend course of action, integrating users' needs and organizational capabilities.
- Oversee and manage all technology vendor and consulting relationships.
- Translate technical information and terminology into language understandable by the stakeholders of the company.
- Represent OMI by participating in industry, business, and professional organizations.
- Determine staffing needs, hire, train, develop and conduct performance and salary evaluations on Division management staff, and others as necessary.
- Assist with the implementation and communication of personnel programs and policies.
- Guide and support managers in development of departmental plans and procedures.
- Direct implementation of strategic and operational plans; monitor progress; taking corrective action, when necessary.
- Formulate and manage division budget.
- Communicate corporate philosophies, goals, plans and progress.
- Exemplify corporate values.
- Meets agreed upon goals and objectives in a timely manner.
Experience/Education

- Bachelor’s degree in a relevant field and a minimum of 10 years’ experience, or any equivalent combination of education, training and experience that demonstrates the required skills.
- A minimum of 4 years of significant technological leadership experience, preferably within a financial sector company.
- Demonstrated success and expertise in broad information technology insurance leadership, including past successes implementing systems to support operations, improving customer satisfaction, innovative technologies and fiscal performance.
- Demonstrated extensive knowledge of computer systems, principles and design.
- Proven ability to organize and manage multiple priorities, and to conduct long term strategic planning.
- Ability to develop, implementing, and improving internal controls and protocols that consistently deliver predictable, accurate, timely results and that assure recoverability.
- Commitment to Company mission and values.
- Ability to effectively represent the Company in various industry, regulatory and judicial forums.
- Proficient in Microsoft Office products.
- Excellent verbal, written, and communication skills, including presentation skills.

Desirable Qualities

- Experience successfully leading organization through a significant technology change.
- Experience working with offshore service providers.
- Experience with business intelligence, data structure, and data mining.
- CPCU or other relevant property/casualty insurance designation.
